

E-GOVERNANCE CITIZEN SERVICE & GRIEVANCE MANAGEMENT SYSTEM

Using SAP ABAP

Project Documentation

Project Program: **Z_GOVERNANCE**

Package: **ZEGOVERNANCE**

Main Database Table: **ZEG_APPLICATION**

Main Screen: **0100 – E-Governance Main Screen**

1. Introduction

The E-Governance Citizen Service & Grievance Management System is an SAP ABAP application designed to manage citizen service applications and grievances in a centralized workflow. Citizens can submit service applications, receive an Application ID, search application information and view consolidated application records through ALV.

2. Objectives

- Maintain citizen application information in an SAP database table.
- Generate an Application ID during application submission.
- Provide input validation and user-friendly messages.
- Allow application search using Application ID.
- Display application records through an ALV report.
- Prepare a Smart Form for printable application output.
- Demonstrate SAP ABAP concepts including DDIC, Open SQL, internal tables, work areas, PBO/PAI, modularization and ALV.

3. System Flow

Citizen → Service → Application → Application ID → Officer Verification → Approval/Reject → Status Tracking

Grievance Registration → Officer Processing → Resolution → Reports

4. SAP ABAP Components Used

Component	Object / Details
Package	ZEGOVERNANCE
Program	Z_GOVERNANCE
Screen	0100 – E-Governance Main Screen
Database Table	ZEG_APPLICATION
Smart Form	ZEG_APPLICATION_FORM
ALV	REUSE_ALV_GRID_DISPLAY
DDIC	Domains and Data Elements
Database Access	Open SQL
Modularization	PERFORM / FORM routines
Screen Processing	PBO / PAI and SY-UCOMM

5. Domains Created

- ZEG_CITIZEN_ID – CHAR 10 – Citizen ID
- ZEG_SERVICE_ID – CHAR 5 – Service ID
- ZEG_APPLICATION_ID – CHAR 10 – Application ID
- ZEG_GRIEVANCE_ID – CHAR 10 – Grievance ID
- ZEG_OFFICER_ID – CHAR 10 – Officer ID
- ZEG_DOCUMENT_ID – CHAR 10 – Document ID
- ZEG_STATUS_ID – CHAR 10 – Status ID

- ZEG_STATUS – CHAR 20 – Application Status
- ZEG_GRV_STATUS – CHAR 20 – Grievance Status
- ZEG_PRIORITY – CHAR 10 – Priority
- ZEG_MOBILE – CHAR 10
- ZEG_EMAIL – CHAR 100
- ZEG_REASON – CHAR 255
- ZEG_ACTIVE – CHAR 1

6. Data Elements Created

- ZEG_DE_CITIZEN_ID, ZEG_DE_SERVICE_ID, ZEG_DE_APPLICATION_ID, ZEG_DE_GRIEVANCE_ID
- ZEG_DE_OFFICER_ID, ZEG_DE_DOCUMENT_ID, ZEG_DE_STATUS_ID, ZEG_DE_APP_STATUS
- ZEG_DE_GRV_STATUS, ZEG_DE_PRIORITY, ZEG_DE_MOBILE, ZEG_DE_EMAIL
- ZEG_DE_REASON, ZEG_DE_ACTIVE

7. Database Table – ZEG_APPLICATION

Field	Type / Description
MANDT	Client – Key
APPLICATION_ID	ZEG_DE_APPLICATION_ID – Key
CITIZEN_NAME	CHAR40
MOBILE	ZEG_DE_MOBILE
EMAIL	ZEG_DE_EMAIL
ADDRESS	CHAR100
SERVICE_NAME	CHAR40
DEPARTMENT	CHAR40
APPLICATION_DATE	DATS
STATUS	ZEG_DE_APP_STATUS
OFFICER_NAME	CHAR40
REMARKS	ZEG_DE_REASON
GRIEVANCE	CHAR255
PRIORITY	ZEG_DE_PRIORITY
CREATED_DATE	DATS
CREATED_TIME	TIMS

8. Main Screen – 0100

- Application Details: Application ID, Citizen Name, Mobile, Email, Address, Service Name, Department, Application Date and Status.
- Processing Details: Officer Name and Remarks.
- Grievance Details: Grievance and Priority.
- Buttons: SAVE, CLEAR, SEARCH, REPORT and EXIT.

9. Program Functionalities

Function	Result
SAVE	Validates mandatory fields, generates Application ID, inserts record and commits data.
CLEAR	Clears screen fields.
SEARCH	Fetches an application using Application ID and displays its details.
REPORT	Reads application data and displays an ALV grid.
EXIT	Leaves the program.

10. Application ID Generation

The current implementation uses SELECT COUNT(*) from ZEG_APPLICATION, adds 1, and formats the value as a 10-character zero-padded Application ID, for example 0000000004.

11. ALV Report

The report uses REUSE_ALV_GRID_DISPLAY with a custom field catalog created in BUILD_FIELDCAT. User-friendly headings are displayed for Application ID, Citizen Name, Mobile, E-mail, Service Name, Department, Application Date, Status, Officer Name and Priority.

12. Smart Form

Smart Form: **ZEG_APPLICATION_FORM**

Import parameter: **IS_APPLICATION TYPE ZEG_APPLICATION**

The form contains Application Details, Service Details and Grievance information and has been activated.

13. Current Working Status

Item	Status
Package / DDIC	Completed
Database Table	Completed
ABAP Program	Completed
Main Screen	Completed
SAVE	Completed
CLEAR	Completed
SEARCH	Completed
ALV REPORT	Completed
Smart Form	Completed

14. Testing Examples

Example 1: Rahul Patil – Income Certificate – Revenue Department – Status SUBMITTED.

Example 2: Sneha Jadhav – Birth Certificate – Municipal Corporation – Priority HIGH – Status SUBMITTED.

15. Conclusion

The project demonstrates a working SAP ABAP based E-Governance application with DDIC objects, database storage, screen processing, validation, application search, ALV reporting and an activated Smart Form. The major project components have been completed and verified during development.
